Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2,7,8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1,2,7,8 define substituents X and E respectively as

X is -N₃, -NH₂, -NH-R₃, =CH-R₈, or -O-R₃ when R₆ is different from phenyl,

E is -N₃, -NH-R₃, =CH-R₈ or -O-R₃ when R₆ is different from phenyl,

. There is no positive recitation of what constitutes X or E.

Claim Rejections - 35 USC § 102and 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Pontiroli et al WO 02/12215.

Pontiroli et al teach the process of claim 3 where substituent E in the final product is OH and R₄ is hydrogen. See page 2 step 2 and page 3 step 3.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Pontiroli et al WO 02/12215.

Pontiroli et al teach the compound of claim 5 where substituent E is OH and R₄ is hydrogen. See page 2 step 2 last compound.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Ojima et al WO 94/22856.

Ojima et al teach compound V of claim 6. See page 2 lines 1-5. Note R₁₀ = acyl reads on the position 13 O substituent.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ojima et al US 5,705,508.

Ojima et al '508 teach compound IV of claim 6 where R_6 is benzene and G_4 corresponds to the 1 position OH. See column 10 scheme 3 compound V, column 4 lines 35-50, column 13 line 25. Patentees differ in that the 14 position hydrogen is not expressly disclosed. However the G_3O substituent is a protecting group for position 1. the obvious deprotection step would yield the desired substituent.

Claim 4 is allowed.
